REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fail to teach and/or suggest a zero gap cell having a gas diffusion cathode made of a single piece of electrically conductive graphitized carbon cloth construction, wherein only a first side of the carbon cloth contains a catalyst and PTFE and the second side is against the ion exchange membrane. The prior art devices all show an electrode with a catalyst layer against the ion exchange membrane, unlike the present invention which shows only one side of the gas diffusion electrode having the catalyst and PTFE, which is mounted on the opposite side of the surface away from the membrane.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
